

City of Morro Bay/Cayucos Sanitary District Wastewater Treatment Plant Upgrade Project

Alternative Analysis Workshop Information Stations

As the first step in conducting a new, robust alternatives analysis for the Wastewater Treatment Plant (WWTP) Upgrade Project, we are seeking your comments and input on potential alternative project sites and the screening criteria to be used in the alternatives analysis. Please visit our Information Stations and leave your written comments for our consideration.

Station 4 Information

Water Reclamation Feasibility

Rough Screening Criteria

- Recycled Water Opportunities
- Irrigation
- Industrial Uses
- Agriculture
- Groundwater Recharge
- Economic factors
- Others?

Station 3 Information

Logistics/Site Constraints

Rough Screening Criteria

- Land Use
- Zoning
- Proximity to Existing Wastewater Facilities
- Site Suitability – Minimum Size for Treatment
- Site Availability – Land Owner Rights
- Legal Restrictions
- Regulatory Restrictions
- Others?

Station 1 Information

Alternative Sites

- Current WWTP Site
- Chorro Valley Site
- Whale Rock Site
- Chevron Oil Facility
- Power Plant Site
- PG&E/City Property
- Hayashi/Giannini Properties
- Hwy 41/Madonna Property
- Others?

Rough Screening Criteria

- Environmental/LCP Policies
- Logistics/Site Constraints
- Water Reclamation Feasibility
- Economic Factors
- Others?

Station 2 Information

Work Plan

Environmental Considerations/LCP Policy

Rough Screening Criteria

- ESHA/Biological Resources
- Floodplain
- Visual Resources
- Public Access/Recreation
- Shoreline Development
- Land Use Conflicts
- Coastal Dependent Development
- Sustainable Use of Public Resources
- Construction Impacts (Air/Noise/Traffic)
- Others?
- Water Quality
- Cultural Resources
- Agriculture
- Coastal Priority Uses
- Coastal Hazards
