

RULES & REGULATIONS:

1. No vessel shall operate in excess of 5 MPH or produce a wake after entering the harbor jetties.
2. Discharge of sewage or contaminant substances of any kind into the bay is prohibited and strictly enforced. Use of detergents or emulsifiers on fuel or oil spills is illegal.
3. SCUBA or free-diving is only allowed outside of the marked channel. The Harbor Department highly recommends divers remain within 100 ft. of an approved dive flag at all times.
4. No person shall operate any vessel or similar device while intoxicated and/or in a reckless or negligent manner.
5. All vessels shall be currently registered and carry the specified safety equipment in accordance with California Boating Law.
6. While kayaking/boating stay a safe distance away from marine mammals and do not disturb otters and migratory birds.

DOCKAGE, FEES & PAYMENT:

NO TIE-UP WITHOUT CITY PERMISSION:

No vessel shall tie up at any City facility without checking in with and getting permission from the Harbor Department. An information card must be filled out for all vessels using City facilities.

FEES ARE DUE IN ADVANCE. The Harbor office is open 6am to 7pm daily. Credit card payments are accepted in the office and via phone.

All Dockage fees—36 foot minimum charge

- ◆ **North & South T-Piers:**
\$0.27 per foot, per day
Electricity \$2.66 per day
- ◆ **City Slips:**

VHF Marine Channel 12 & 16

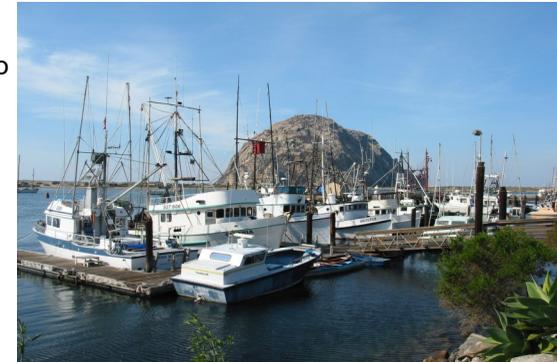

WELCOME....

The Morro Bay Harbor Department is part of the City of Morro Bay. The Harbor Department provides assistance to all boaters and visitors to the Harbor. The Morro Bay Harbor Patrol monitors VHF Channel 16 and operates on VHF Channel 12 from 6am-7pm, the office phone number is (805) 772-6254. The Coast Guard maintains a 24 hour watch and also monitors VHF Channel 16. The Coast Guard phone number is (805) 772-2167. We encourage feedback from all visitors and users of the Morro Bay Harbor. **For emergency assistance call 911.**

SAFE BOATING HINTS FOR MORRO BAY

The Morro Bay Harbor entrance can, at times, be one of the roughest on the West Coast. Please do not become a statistic.

- ◆ Always check local marine forecasts and tide tables before operating your vessel.
- ◆ Never transit the harbor mouth if large waves are standing up or breaking in the channel.
- ◆ Fog may be encountered in the area at any time. Never leave the harbor without knowledge of how to use a compass, charts and electronic aids to navigation.
- ◆ Check all safety equipment before starting on any trip.
- ◆ Always carry suitable anchor gear in case of engine failure.
- ◆ Always carry either a functioning VHF marine radio or cellular phone with adequate coverage in the area to call for assistance should an emergency arise.

HARBOR HISTORY

Often called "the jewel of the Central Coast," Morro Bay is a close-knit community known for its vibrant fishing industry and unique natural beauty.

The guardian to the entrance of the Harbor, Morro Rock, has been a landmark and navigational guide for hundreds of years. Chumash Native Americans were the first to cultivate the land and sea near the Rock and its seven volcanic sister peaks.

The town of Morro Bay grew around the turn of the century as schooners arrived in the harbor for trade. Over the years strong fisheries developed in shark, salmon, albacore and abalone. Initially boats entered the harbor on both the north and south sides of Morro Rock. But the area was known to be dangerous because of high surf, surging tides, erratic winds and shifting channels.

Morro Bay was jolted by blasts in 1933 as a man-made causeway was built closing the north entrance and connecting the Rock with the mainland. The south channel was dredged and a breakwater protecting the entrance was constructed during World War II by the Army Corps of Engineers. The current Embarcadero area was formed from the dredged material.

In 1995 Morro Bay was federally designated as a National Estuary and the National Estuary Program was formed to work towards enhancing and maintaining the estuary's vital habitat.

The City maintains and operates North & South T-Piers (shown on map) for transient vessels. A City floating dock and anchorage area are also available to transient vessels. In addition, the City maintains approximately 50 slips and 70 moorings for home-ported vessels. Occasionally these slips and moorings are available for transient use. Use of the City Launch Ramp at Tidelands Park is free. Most other facilities in the Harbor are operated privately. Always obtain permission before docking your vessel at any facility in the Harbor.

SLIPS, MOORINGS & DOCKS

Morro Bay Marina: 699 Embarcadero, 772-8085—Moorings to 50' and slips to 35', NE of #12.
