RETROFIT REBATE PROGRAM

The purpose of the retrofit rebate program is to promote water conservation.

Requirements

The following guidelines have been established to receive a reimbursement for the purchase of water saving fixtures.

1. You must be a customer of the City of Morro Bay's water service.
2. Installation of the retrofitted items must be in accordance with all applicable codes.
3. The applicant must attach a legible copy of a sales receipt, listing the purchase price of retrofitted items.
4. A rebate of up to \$100.00 dollars per retrofitted bathroom will be given to the program participants but the rebate will not exceed the total purchase price of retrofitted items.
5. A building inspector will need to inspect the property to verify retrofit has been done.

The City recommends that the sewer line be cleaned at the time of installation if it has not been cleaned within the previous twelve months.

Inspection

Properties will be inspected after the installation to insure compliance with the Uniform Plumbing Code.

Please call the Public Services Department at (805) 772-6267 to schedule a retrofit inspection appointment.

Rebate

If the requirements listed previously are satisfied, a rebate of up to \$100 per bathroom will be paid to the applicant. The rebate will not exceed the total purchase price of retrofitted items. Those items previously retrofitted will be checked off, but compensation will be limited to dual flush toilets submitted with a valid receipt.

Certificate of Compliance

Relating to retrofitting upon transfer or sale of property. Ordinance No. 395 requires that, upon transfer of ownership, dwellings must retrofit with water conserving plumbing fixtures. This Ordinance does not affect your eligibility for a rebate and if you are applying for the rebate as a result of the Ordinance you may request a copy of the Certificate of Compliance (Retrofit upon transfer of sale \$35 fee).
